CO₂

CO₂ EMISSIONS : A -10% DROP IN 2016 VS 2015 IN DIRECT EMISSIONS DUE TO DECREASING COAL AND NUCLEAR INCREASE

2016 - UNAUDITED FIGURES

COVERAGE OF CO₂ EMISSIONS

In mt

Direct emissions (scope 1) of greenhouse gases in 2016	120
---	------------

of which direct emissions (scope 1) of greenhouse gases under the EU-ETS system	43
--	-----------

<i>Allocation of bonus quotas</i>	<i>4.1</i>
-----------------------------------	------------

CO₂ EMISSIONS RATIO : A -12% DROP IN 2016 VS 2015 DUE TO DECREASING COAL AND NUCLEAR INCREASE POSITIONING ENGIE AMONG THE LOW-EMISSION PRODUCERS

EUROPE

ENGIE significantly reduced its CO₂ emissions ratio (-21%) in Europe from 377 (in 2015) to 298 (in 2016) kg CO₂ / MWh

Specific emissions linked to electricity production in Europe position ENGIE close to the European average

WORLD

Group's specific emission ratio 20% below world average ratio⁽¹⁾

2020 target: To reduce the CO₂ specific emission ratio of power and associated heat generation fleet throughout the world by 20% between 2012 and 2020

2016 situation: -11% vs 2012 ⁽²⁾

Actions

- No new coal generation project
- Replacing high emitting plants by top performing units
- Selective development in renewables

(1) Source : AIE 2014

(2) 393 kgCO₂eq/MWh in 2016 vs 443 kgCO₂eq/MWh in 2012 (excluding SUEZ)

GAS BALANCE

2016 GAS BALANCE: DIVERSIFIED PORTFOLIO

In % consolidation

LONG-TERM GAS SUPPLY

DIVERSIFIED SUPPLY PORTFOLIO PROVIDES FLEXIBILITY

BALANCED SALES PORTFOLIO REDUCES VOLUME RISKS

(1) Purchases from gas suppliers ; origin unspecified and of which Australia and UK <1% each

(2) Of which others: 11 TWh

(3) France: 68 TWh, Mexico, Argentina, Romania, Italy, Hungary, Turkey

OUTRIGHT POWER GENERATION IN EUROPE Nuclear & Hydro

OUTRIGHT POWER GENERATION IN EUROPE

CWE outright: forward prices and hedges

€/MWh

Forward outright prices Belgium baseload

Nuclear Hedges: prices & volumes

In €/MWh

As of 12/31/16
France, Belgium including D1&2 extension

CWE outright: EBITDA price sensitivity

- +/- €1/MWh in achieved price
↔ ca. +/- €60m EBITDA impact before hedging
- 3-year rolling hedging policy

(1) 2016-2018 estimates including D1 & 2 extension, average hydro conditions

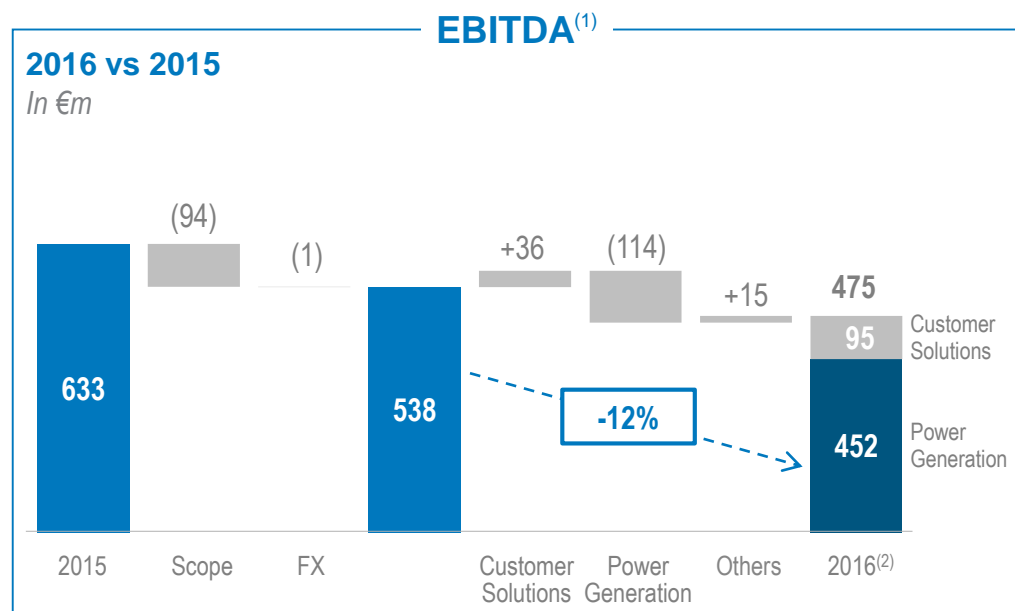

REPORTABLE SEGMENTS

NORTH AMERICA

Transitioning from merchant generation to customer solutions activities

Power Generation:

- Weaker commodity prices on merchant markets
- Divestment of US merchant hydro (June)

Customer Solutions:

- Residential market: purchase of Guttman Energy B2B power customer book
- Acquisition of OpTerra and Green Charge Networks

Lean 2018

EBITDA 2017 Outlook

- Continued pressure on Power Generation unit margins
- Completion of US merchant thermal assets divestment
- Continued integration of Services businesses
- Focus on US retail business expansion

LATIN AMERICA

EBITDA growth driven by reversal of provision in 2016 and impacts from commissioning of new assets

Brazil:

- Negative impact from EUR/BRL
- Reversal of provision in 2016
- Lower spot prices compared to 2015, partially offset by improved GSF and inflation on PPAs

Latin America:

- Peru: higher volumes under existing PPAs and Nodo, Chilca and Quitaracsa COD, partly offset by lower prices
- Mexico: tariff increase and Mayakan extension COD effect (April 2015)
- Chile: decrease in commodity prices affecting sales

Lean 2018

EBITDA 2017 Outlook

- Brazil: improved forex, incremental price increase in bilateral sales due to inflation
- Latin America: COD impact of Nodo / Chilca (Peru) and Los Ramones (Mexico), tariff review in Mexico

BENELUX

Strong EBITDA increase due to the restart of Doel 3, Tihange 2 and Doel 1

Power Generation:

- Doel 3, Tihange 2 & Doel 1 restart end 2015, good nuclear availability despite Tihange 1 outage in H2 2016

Customer Solutions:

- Lower results in Services (notably Oil & Gas sector)
- Improved retail margins in Belgium

Lean 2018

EBITDA 2017 Outlook

- Decrease in power prices
- Recovery in services despite continued difficulties in Oil & Gas sector
- Restart of Tihange 1 expected on 1st April 2017

(1) Number of contracts is consolidated at 100%, excluding entities at equity method

(2) Sales figures are consolidated according to accounting rules, Group contribution

FRANCE

Positive temperature effect on retail gas sales, increased retail power sales, and higher renewables production

- **France Renewables:**
 - Higher hydro volumes but lower electricity prices
- **Customer Solutions:**
 - Services : Solfea deconsolidation, improved performance in B2B
 - Energy sales : strong increase in power sales ; positive temperature effect on gas sales offset by decreasing B2B volumes and margins

Lean 2018

EBITDA 2017 Outlook

- Further improvement in margin ratios in services
- Commissioning of wind and solar assets
- Downward trend in power prices but limited impact thanks to hedging policy

SUSTAINABILITY

THE ENGIE CSR 2016 RESULTS

ENGIE committed in 2016 to six new ambitious CSR objectives to be achieved by 2020, which aims at supporting its strategic ambition and demonstrating its impacts on society.

The 2016 CSR results indicate that the Group is on track and fully committed to implement its sustainable growth strategy

Objective	Key Performance Indicator	Effective value in 2015	Effective value in 2016	Target value in 2020
1) Supporting our customers in the energy transition	Satisfaction rate among our B2C customers	na	81%	85%
2) Renewables	Share of renewable energy in the generating capacity	18.3%	19.5%	25%
3) Greenhouse gas emissions	% reduction in ratio of CO ₂ emissions to energy production compared with 2012	+0.6%	-11.3%	-20%
4) Stakeholder dialogue	% of industrial activities covered by a suitable dialogue and consultation mechanism	na	20%	100%
5) Gender diversity	% of women in the Group's workforce	21.6%	21.9%	25%
6) Health and safety	Internal frequency rate for occupational accidents	3.6	3.6	< 3

WHAT IS CSR FOR ENGIE?

Long term business thinking

- Designing successful services & offers for our clients
- Following international standards of responsible business
- Delivering capital projects on time and on budget
- Encouraging green finance
- Creating shared value by addressing main CSR challenges
- Increasing staff engagement by training

GREEN ELECTRICITY SUPPLY IN FRANCE

- Since October 2016, for new contracts, ENGIE exclusively sells green electricity at no additional cost to Households and small Business in France.
- Offers are covered by Guarantees of Origin from renewable energy producers.

Already 185 000 green electricity clients end of December 2016

Objective of 1 Million green electricity clients by the end of 2017

The logo for 'elec' verte*' features a stylized graphic of a yellow and blue circle with a white dot in the center, resembling a power button or a drop. To the right of this graphic, the word 'elec'' is written in a green, sans-serif font, and 'verte*' is written below it in a larger, bold, green, sans-serif font. The entire logo is enclosed in a thin green rectangular border.

* ENGIE purchases the equivalent of the amount of electricity consumed by the customer in Guarantees of Origin issued by renewable energy producers, for any new electricity contract subscribed by a particular customer, excluding the Happ'e electricity supply. A Guarantee of Origin certifies that electricity has been produced from a renewable energy source and injected into the electricity grid.

THE ENGIE MANAGEMENT OF ETHICS AND COMPLIANCE

ENGIE's ethics and compliance framework

- A commitment at the **highest managerial levels** and a **dedicated organization**
- Reference texts to support the ethics culture and practice:
 - **Ethics charter** and **Practical guide to ethics**
 - **Integrity referential**: prevention of fraud, corruption and influence peddling
 - **Human Rights referential**: respect of internationally recognized human rights
 - **Compliance Management referential**: whistleblowing and reporting of ethics incidents, measurement and control of compliance, embargo/data privacy/competition law compliance
 - **Codes of conduct**: application of ethics commitments to business practices and operations
- A **Risk assessment** process
- **Training** and awareness creation campaigns

ENGIE's ethics and compliance 2016 results

- **Updated Ethics charter and practical guide**, translated into 20 languages:
 - Addresses more stringent legislative anti-corruption framework
 - Incorporates ENGIE's decision to no longer participate in financing political activities
- **Strengthened ERM process** through the use of a common analysis methodology for assessing the risk of corruption and human rights violations
- **84% of senior executives** followed the in-person training on prevention of fraud and corruption since its introduction in 2012; **more than 14 000 members of staff** trained in 2016

THE ENGIE CSR 2016 RATINGS AND RANKINGS

Total Score (2016)

- ENGIE Industry Leader of the Multi-Utilities and Water sector (MUW)
- Listed in the Dow Jones Sustainability Indexes *World & Europe*
- Awarded the “Gold Class Sustainability 2017 Award”

- CDP Climate Change : A list
- CDP Water : A- list

- Performance: 61/100
- Category robust
- Listed in the Euronext VigeoEiris indexes : *World 120, Europe 120, Eurozone 120 and France 20*

FULL ALLOCATION OF GREEN BOND BY THE END 2016

ENGIE's Green Bond launched in 2014

- A green bond for a total of €2,5 billion, in 2 tranches comprised of €1,2 billion for 6 years and €1,3 billion for 12 years
- €2,5 billion allocated at end of 2016 on 48 projects
- 77 projects with an average size of €32 million.

Projects funded by Green Bond from 2014 to 2016

% FUNDS ALLOCATED BY GEOGRAPHICAL AREA

% FUNDS ALLOCATED BY TECHNOLOGY

THE ENGIE POSITION ON CARBON PRICING

Since 2013, ENGIE openly advocates for the generalization of carbon prices in the World

- To signal for low carbon investments
- One of the best ways to accelerate the transition

ENGIE is a Member of the Carbon Pricing Leadership Coalition (World bank, IMF, WEF, IETA, UN Global Compact, CDP, ...) which committed to :

- x2 by 2020 the coverage of emissions by carbon pricing regulations (25%)
- And x2 again the coverage by 2030 (50%)

Mr Mestrallet nominated co-president of the French mission on carbon pricing, which made proposals to reinforce the carbon pricing signals, among them :

- Set a price corridor on the EU ETS at European level

EUR/Ton of CO₂

Figure 1: Trajectory of the soft price collar proposed by the commission

THE TERRAWATT INITIATIVE

TERRAWATT INITIATIVE
GROWING SOLAR POWER TOGETHER

The context of the 21st century Energy Revolution

- A massive expansion of electricity both geographically and in its usages, leading to a fast modernization, universalization and de-fossilization of our power systems
- The alliance of renewable energies, digital power management technologies, power storage and energy efficiency, to provide everyone everywhere with an energy service of quality, clean and much cheaper than today.
- Because it is universal, simple, scalable, flexible, clean and competitive, solar PV provides a simple and pragmatic solution to a very substantial part of our our needs for low cost power.

The Terrawatt Initiative

- Engie, together with a group of energy, industry, technology and finance global leaders decided at COP 21 in Paris to launch, alongside the International Solar Alliance, the Terrawatt Initiative (TWI), the first private non-profit organization aiming at accelerating the cost reduction of solar PV generation, by tackling the structural barriers existing in the market, to unlock as fast as possible all its benefits for humanity.
- TWI is willing to (i) promote the deployment of 2.5 TW of solar PV in the 10 coming years, (ii) draw collectively a positive vision the society the Energy Revolution may lead to, (iii) propose a pathway and concrete steps to achieve it, and (iv) mobilize the world's public opinion through education, information and communication actions and to empower the citizens into the Energy Revolution.
- As a first step, TWI promotes concrete political, economic, legal and financial actions. With its global network and partners, TWI actively works on (i) leaner regulations, (ii) more efficient market practices, in particular standardized contractual documentation, and (iii) structural risk mitigation tools. It offers technical assistance to accompany key stakeholders in their implementation, including via cross-cultural capacity building programs and leadership sessions.

THE ENGIE MANAGEMENT OF WATER RESOURCES

ENGIE's water management methodology

- Identifying industrial sites located in water-stressed areas (with Aqueduct tool)
- Assessing water footprint of ENGIE activities and its main industrial sites
- Confirming the level of water stress locally
- Implementation of local action plans in concertation with stakeholders to reduce water consumption, limit impacts on ecosystems or improve watershed management

ENGIE's water management results

- ENGIE has reduced the ratio of its freshwater withdrawal to electricity generation by -16% in 2015 and by -24% in 2016 in comparison with 2012
- In 2013-2014, ENGIE assessed water footprint of sites of electricity generation
- In 2015, ENGIE carried out the assessment of water footprint of gas supply chain
- In 2016, the group has started the evaluation of water risks for ENGIE upstream suppliers
- ENGIE supports and integrates regional plans (Plan of hydraulic and ecological restoration of the Rhône – France ; Good water program – Salto Santiago, Brazil)

CONTRIBUTION OF ENGIE CSR OBJECTIVES TO UNITED NATIONS SDGS

ENGIE CSR objectives support the Group's ambition of energy transition leaderships and contribute to the global sustainable development priorities defined by the United Nations:

- Good 3 through CSR objective of Health and Safety (internal accident frequency rate below 3 by 2020), “our live-saving rules” to reduce fatal accidents
- Goal 5 through CSR objective of Mixity (25% of woman in the workforce by 2020), 33% of woman appointed as topex in 2016
- Goal 6 as member of the CEO water mandate from 2008
- Goal 7 through CSR objective on Renewable Capacities (25% of the energy mix by 2020), new renewable projects, sustainable energy access for all (1,2 M beneficiaries in 2016 of “Rassembleurs d’Energies” projects)
- Goal 11 and Goal 12 through CSR objective on supporting our customers in the energy transition (satisfaction rate above 85% by 2020) and CSR objective on Stakeholder Engagement (all industrial activities covered by a suitable dialogue)
- Goal 13 through CSR objective on CO2 Reduction (-20% for energy production CO2 ratio by 2020), new deals of closing/sells of coal assets in 2016 (Hazelwood, Polaniec,...)
- Goal 14 and 15 through ENGIE’s commitment to the French National strategy on Biodiversity (SNB) from 2012

FINANCIAL APPENDICES

FY 2016 RESULTS

The logo for ENGie, featuring the word "ENGie" in a white, lowercase, sans-serif font. The letter "i" has a dot. The logo is positioned in the lower right quadrant of the image, overlaid on a blue-tinted background of solar panels. A white, semi-transparent circular shape is partially visible behind the text.

ENGie

A decorative horizontal bar at the bottom of the page, consisting of a series of overlapping, rounded rectangular segments in various shades of blue and teal.

CHANGE IN NUMBER OF SHARES, SCOPE & FOREX

MAIN CHANGES IN CONSOLIDATION SCOPE

ACQUISITIONS

OpTerra Energy Services – USA (NORTH AMERICA)

Full consolidation since 02/25/2016

IMA Group – Chile (LATIN AMERICA)

Full consolidation since 07/01/2015

Trilogy Servicing (TSC Group) – Australia (AFRICA/ASIA)

Full consolidation since 09/10/2015

Nexilis Group – France (FRANCE)

Full consolidation since 11/01/2015

Solairedirect – France (OTHER)

Full consolidation since 09/03/2015

Vandewalle SA – Belgium (BENELUX)

Full consolidation since 07/01/2015

Desa Australia Pty Ltd – Australia (AFRICA/ASIA)

Full consolidation since 12/02/2015

Engie Storage LLC (Green Charges Networks) – USA (NORTH AMERICA)

Full consolidation since 04/28/2016

CHANGES IN METHOD

Solfea – France (FRANCE)

Full consolidation until 12/21/2015; Equity method since 12/22/2016

Maïa Eolis – France (FRANCE)

Equity method until 05/25/2016; Full consolidation until 12/15/2016

Equity method since 12/16/2016

DISPOSALS/PARTIAL DISPOSALS

Merchant thermal activities – USA (NORTH AMERICA)

Full consolidation until 12/15/2015

Held for sale since 12/16/2015 (until 02/07/2017)

Merchant hydro activities – USA (NORTH AMERICA)

Full consolidation until 12/15/2015

Held for sale from 12/16/2015 until 06/01/2016

GSEM - M&S – Hungary (EUROPE)

Full consolidation until 09/28/2015

Meenakshi – India (AFRICA/ASIA)

Full consolidation until 06/29/2016

Held for sale from 06/30/2016 to 09/30/2016

TEN – Chile (LATIN AMERICA)

Full consolidation until 01/26/2016

Equity method since 01/27/2016

Paiton – Indonesia (AFRICA/ASIA)

Equity method until 11/29/2016

Held for sale from 11/30/2016 to 12/22/2016

Polaniec – Poland (OTHER)

Full consolidation until 12/23/2016

Held for sale since 12/24/2016

NET DEBT BREAKDOWN BY RATE AND CURRENCY

DISCLAIMER

Forward-Looking statements

This communication contains forward-looking information and statements. These statements include financial projections, synergies, cost-savings and estimates, statements regarding plans, objectives, savings, expectations and benefits from the transactions and expectations with respect to future operations, products and services, and statements regarding future performance. Although the management of ENGIE believes that the expectations reflected in such forward-looking statements are reasonable, investors and holders of ENGIE securities are cautioned that forward-looking information and statements are not guarantees of future performances and are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of ENGIE, that could cause actual results, developments, synergies, savings and benefits to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the public filings made by ENGIE with the Autorité des Marchés Financiers (AMF), including those listed under “Facteurs de Risque” (Risk factors) section in the Document de Référence filed by ENGIE (ex GDF SUEZ) with the AMF on 23 March 2016 (under no: D.16-0195). Investors and holders of ENGIE securities should consider that the occurrence of some or all of these risks may have a material adverse effect on ENGIE.
