## ENGIE wins major contract with Transport for London

In London, ENGIE has been awarded a major 5-year contract with TfL (Transport for London) to deliver a range of maintenance services across over 500 locations.

The contract will see ENGIE provide planned and reactive maintenance for mechanical and electrical systems, fire detection and suppression systems across the London Underground network. Maintenance of fire safety systems will also be provided for TfL's other offices and facilities.

Service delivery by around 330 ENGIE employees will be supported by a 24/7 helpdesk, computer aided facilities management (CAFM) software and hand-held technology for operatives. The contract will also provide TfL with access to ENGIE's energy management capabilities. The ability to self deliver the required services will be a key element in ENGIE delivering a successful contract. In helping TfL to improve performance and efficiency of London's transport systems, ENGIE is helping to ease the use of public transport in a major city - a greener solution for mobility.

BETTER MOBILITY  
**TODAY**

Across the world, the Group is offering today an ecosystem of solutions adapted to the customers' needs to make mobility more fluid, cleaner and smarter. Public transport is a proven and time-honored part of mobility solutions and ENGIE has already outfitted 12,000 kilometers of railroads and 1,800 light tramways with electrification, signal and telecom systems. 35,000 buses are equipped with ENGIE solutions, and the Group recently announced the acquisition of Icomera, the world's leading Wi-Fi provider for public transport which operates in more than forty countries.

In the UK, ENGIE has been operating for the past 30 years and employs 20,000 people. ENGIE provides a range of outsourced services to the public and private sectors over 14,000 UK sites. The Group is also one of the top suppliers of electricity and gas to UK businesses and one of the largest independent power producers in the country. ENGIE has recently launched its home energy business, becoming the largest company to enter the UK domestic energy market for over 15 years.

#### **About ENGIE**

*ENGIE develops its businesses (power, natural gas, energy services) around a model based on responsible growth to take on the major challenges of energy's transition to a low-carbon economy: access to sustainable energy, climate-change mitigation and adaptation and the rational use of resources. The Group provides individuals, cities and businesses with highly efficient and innovative solutions largely based on its expertise in four key sectors: renewable energy, energy efficiency, liquefied natural gas and digital technology. ENGIE employs 153,090 people worldwide and achieved revenues of €66.6 billion in 2016. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main international indices: CAC 40, CAC 40 Governance, BEL 20, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe, DJSI World, DJSI Europe and Euronext Vigeo (World 120, Eurozone 120, Europe 120 and France 20).*
