

ENERGY SUFFICIENCY AND EFFICIENCY: WHAT ARE THE DIFFERENCES?

Sufficiency

Efficiency

Cycling instead
of driving

Using a hybrid
or electric vehicle

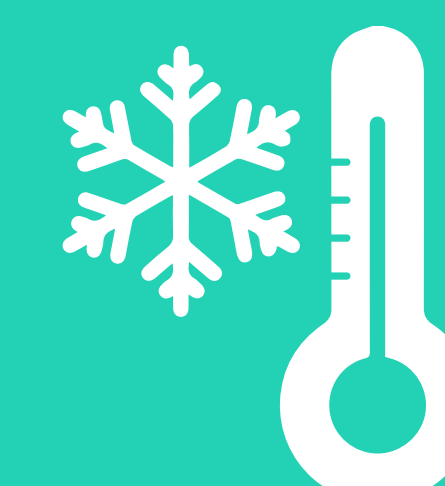

MOBILITY

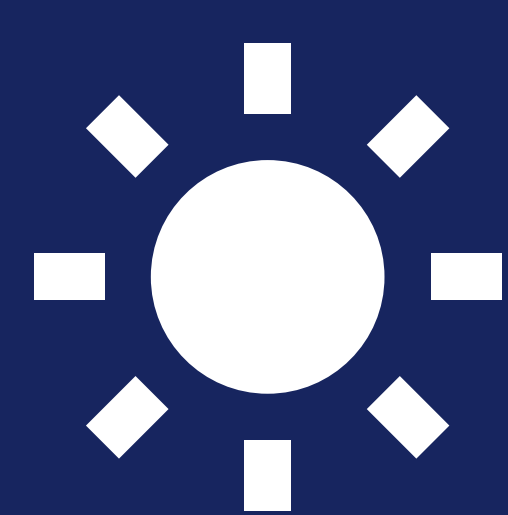

Reducing the surface area
per inhabitant/user

Heating and cooling
buildings with high-
performance equipment

BUILDING

Using
natural light

Using
LED bulbs

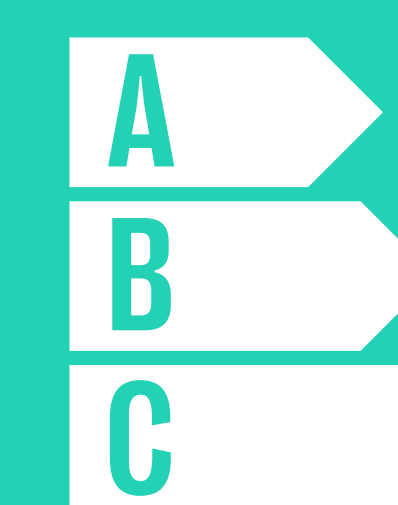

LIGHTING

Using a clothesline
or rack

Using a dryer
with a good
energy rating

HOUSEHOLD CHORES

Limiting
data production

Store data in a
high-efficiency
data centre
